Serving others, giving hope, changing lives

Caring for the Health of Our Seniors

As our population ages, proactively addressing the health concerns of our senior patients can help provide greater quality of life and help seniors remain independent.

HopeHealth recently established a **free Hope Gold program** to address senior health issues and ensure that senior patients with chronic conditions are getting everything they need to successfully manage their health.

Open to seniors age 65 and older, the program helps patients focus on their physical health, their mental health, and can help them manage multiple chronic conditions.

In addition to wellness visits, the program incorporates assessments that take a closer look at factors that can impact health such as fall risks, physical activity levels, and functional abilities. It is specifically designed for those 65 and older who have been diagnosed with one or more chronic conditions.

Hope Gold enhances the care patients receive and increases services that are available to them. Hope Gold care coordinators work with program members to provide extra assistance in navigating health care needs, connecting with area resources, and remaining on track with health care plans.

Call (843) 432-2943 to enroll in the Hope Gold program or for more information.
