THURSDAY & FRIDAY, 9 AM - 3 PM

**FLORENCE CENTER**  
EXHIBITS | ENTERTAINMENT  
Q & A TIME | HEALTH SCREENINGS  
DEMONSTRATIONS | + MUCH MORE

## The Importance of Colorectal Cancer Screening

Colorectal cancer kills. It is the second leading cause of cancer death in South Carolina, and the fourth most commonly diagnosed cancer – each of us has a 1-in-20 lifetime chance of diagnosis. On average each year, 2,100 people are diagnosed with this cancer after it has spread beyond the large intestine, and 800 die.

Visit [hope-health.org/blog](https://hope-health.org/blog) to learn how you can reduce your risk of developing colorectal cancer and make an appointment talk to your provider about screening today.

## Make Your Voice Heard!

In March, HopeHealth is reaching out to hear **YOUR** thoughts on the challenges and needs that shape the quality of life and health of you and your neighbors. Your valuable input will help directly shape the way care is provided in the coming years at HopeHealth. Here's how you can make your voice count in two easy steps:

1. When you visit a HopeHealth office during the first two weeks of March (March 2-14), you will be invited to participate in a 10-15 minute survey. Please carefully complete each question of the survey while you wait to see your provider.

2. Trade the completed survey at the front desk for a small treat. It's our way of saying thank you for sharing your thoughts and ideas with us this spring.

Together, we can make a powerful difference in the health and well-being of our friends, family, and community.

## COVID-19 Coronavirus Updates

For up-to-date information on the coronavirus, visit the Centers for Disease Control and Prevention at [CDC.gov](https://www.cdc.gov).

For updates about COVID-19 and your local community, visit [hope-health.org/news](https://hope-health.org/news)

## Scheduled Closing

All HopeHealth offices will be closed Wednesday, April 1 for employee training.
